06 — PHOTOGRAPHY & IMAGERY

Visual Style

All photography should feel warm, editorial, and timeless — never trendy or over-processed. Think light and airy with rich skin tones.

WARM TONES

LIGHT & AIRY

CINEMATIC MOOD

PHOTO DO'S

Warm, natural color grading.

Soft, diffused natural light preferred.

Film-like grain is welcome (subtle).

Focus on emotion and real moments.

Desaturated warm tones — think Fuji 400H.

PHOTO DON'TS

No heavy HDR or oversaturated looks.

No trendy presets (orange & teal, etc.).

No harsh flash photography.

No stock-photo-looking posed shots.

No cool/blue color temperature.

07 — VOICE & TONE

How We Speak

Our voice is confident but never arrogant. Professional but never cold. We speak filmmaker-to-filmmaker, peer-to-peer.

Confident

Warm

Concise

We know our craft. We speak with authority about post-production because we've done thousands of edits.

We're in the business of love stories. Our communication reflects genuine care for our clients' success.

Our clients are busy filming. We respect their time with clear, direct communication — no fluff.

WE SAY

"We'll handle the edit — you focus on filming."

"Cinematic quality, every time."

"Your brand, elevated."

"Trusted by filmmakers across the US."

WE DON'T SAY

"Cheap editing services."

"We're the best in the business." (show, don't tell)

"Outsource your work to us." (feels impersonal)

Overly casual slang or internet speak.
